ITA0329-MOBILE COMPUTING

ASSESSMENT TOOL – 1

Date:10/10/2026 **Reg.No:192311411**

Name: M.Nirosha

Question:

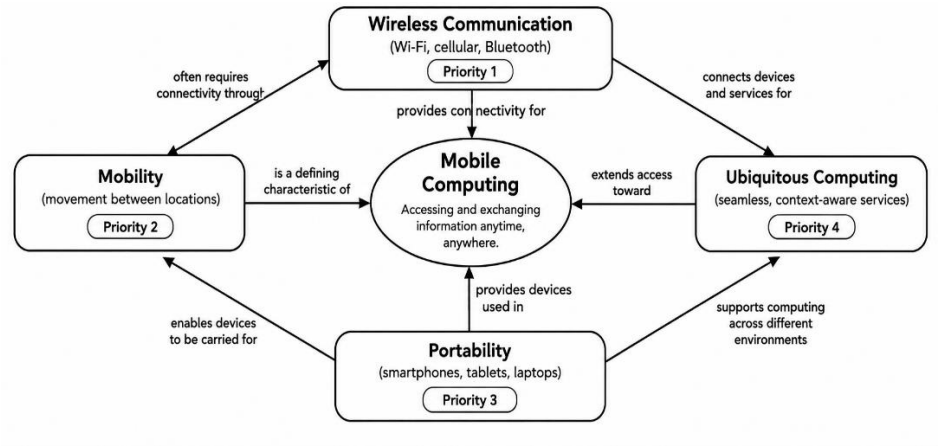

1. Design a concept map that evaluates the significance of the fundamental concepts of mobile computing.

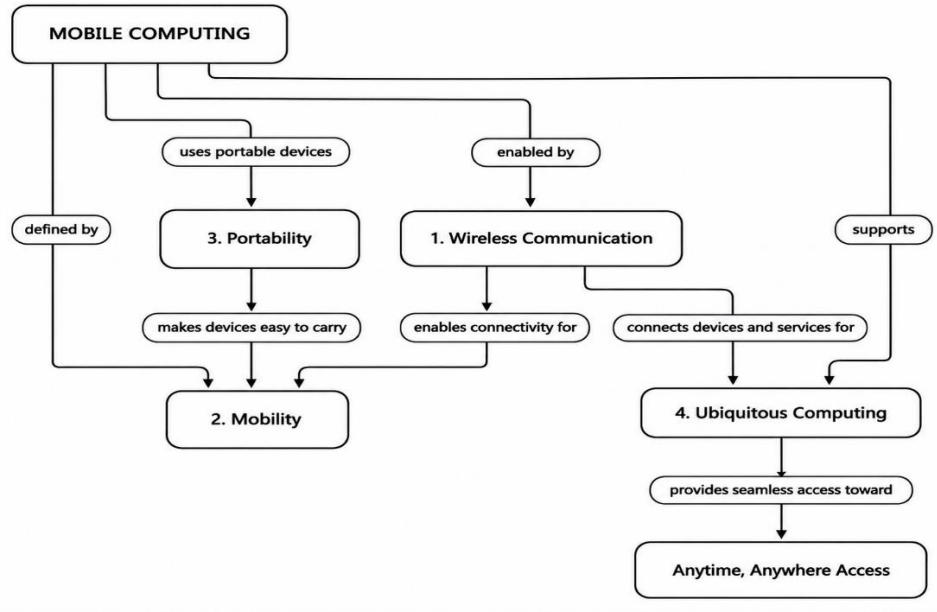

Establish relationships among mobility, portability, wireless communication, and ubiquitous computing.

Prioritize the concepts based on their contribution to mobile computing.

Justify the linking phrases used between the concepts.

Concept Mapping:

Wireless Communication
(Wi-Fi, cellular, Bluetooth)
Priority 1
often requires connectivity through
provides connectivity for
connects devices and services for
Mobility
(movement between locations)
Priority 2
is a defining characteristic of
Mobile Computing
Accessing and exchanging information anytime, anywhere.
extends access toward
Ubiquitous Computing
(seamless, context-aware services)
Priority 4
provides devices used in
enables devices to be carried for
supports computing across different environments
Portability
(smartphones, tablets, laptops)
Priority 3

MOBILE COMPUTING
uses portable devices
enabled by
defined by
3. Portability
1. Wireless Communication
supports
makes devices easy to carry
enables connectivity for
connects devices and services for
2. Mobility
4. Ubiquitous Computing
provides seamless access toward
Anytime, Anywhere Access
